DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 20, 2010 has been entered.

Allowable Subject Matter

2. Claims 1 and 16 are allowed.
3. The following is an examiner's statement of reasons for allowance: As to Claim 1, the prior art fails to teach or suggest, either alone or in combination: "A liquid crystal display, comprising: a liquid crystal panel having two screens; a first front light placed in a vicinity of one of the two screens of said liquid crystal panel; a second front light placed in a vicinity of the other one of the two screens of said liquid crystal panel; a pixel driving circuit configured to drive pixels of said liquid crystal panel to display an image on said liquid crystal panel, wherein said pixel driving circuit alternately displays a first image and a second image on said liquid crystal panel; said first front light lights up while the first image is displayed on said liquid crystal panel by said pixel driving circuit, and said second front light lights up while the second image is displayed on said liquid crystal panel by said pixel driving circuit, each of said first and second front lights is configured to light up repeatedly, thereby each of different images is

simultaneously displayed on a front surface direction and a back surface direction of said liquid crystal panel; a light source of said first front light and a light source of said second front light are disposed opposite to each other with respect to a direction along the screens of said liquid crystal panel; and the direction in which light is mainly emitted out of each of the first and second front lights is inclined toward a direction opposite to a direction of the light source of each of the first and second front lights by an angle of 5 to 10 degrees with respect to the direction perpendicular to the liquid crystal panel, respectively."

As to Claim 16, the prior art fails to teach or suggest, either alone or in combination: "Information equipment comprising: a liquid crystal display, including a liquid crystal panel having two screens, a first front light placed in a vicinity of one of the two screens of said liquid crystal panel, a second front light placed in a vicinity of the other one of the two screens of said liquid crystal panel, a pixel driving circuit configured to drive pixels of said liquid crystal panel to display an image on said liquid crystal panel, wherein said pixel driving circuit alternately displays a first image and a second image on said liquid crystal panel, said first front light lights up while the first image is displayed on said liquid crystal panel by said pixel driving circuit, and said second front light lights up while the second image is displayed on said liquid crystal panel by said pixel driving circuit, each of said first and second front lights is configured to light up repeatedly, thereby each of different images is simultaneously displayed on a front surface direction and a back surface direction of said liquid crystal panel,

a light source of said first front light and a light source of said second front light are disposed opposite to each other with respect to a direction along the screens of said liquid crystal panel, and the direction in which light is mainly emitted out of each of the first and second front lights is inclined toward a direction opposite to a direction of the light source of each of the first and second front lights by an angle of 5 to 10 degrees with respect to the direction perpendicular to the liquid crystal panel, respectively."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
